2. Recommended anti-virus options are listed:
  - a. Avira
  - b. Avast
  - c. Bitdefender
  - d. Bullguard
  - e. ESet
  - f. Kaspersky
  - g. McAfee/Trellix
  - h. Symantec Norton

- 1<sup>st</sup> click on **Wi-Fi** icon
- 2<sup>nd</sup> select the **USP-WiFi** signal to connect

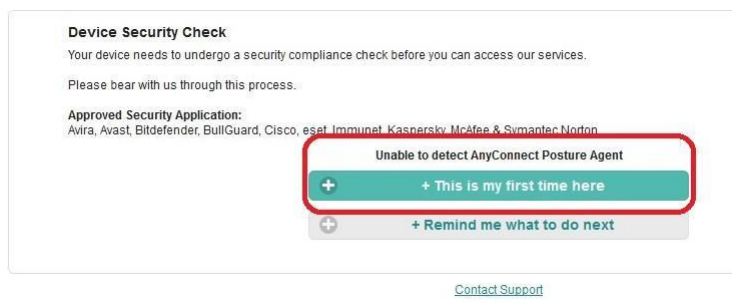

- Clicking on “**Connect**” will allow you to continue.
- Credentials entered for user verification.  
Eg.) Student: student\s11111111  
Staff: laucala\coalala\_v
- Clicking “**Connect**” again gets you through this credentials checks

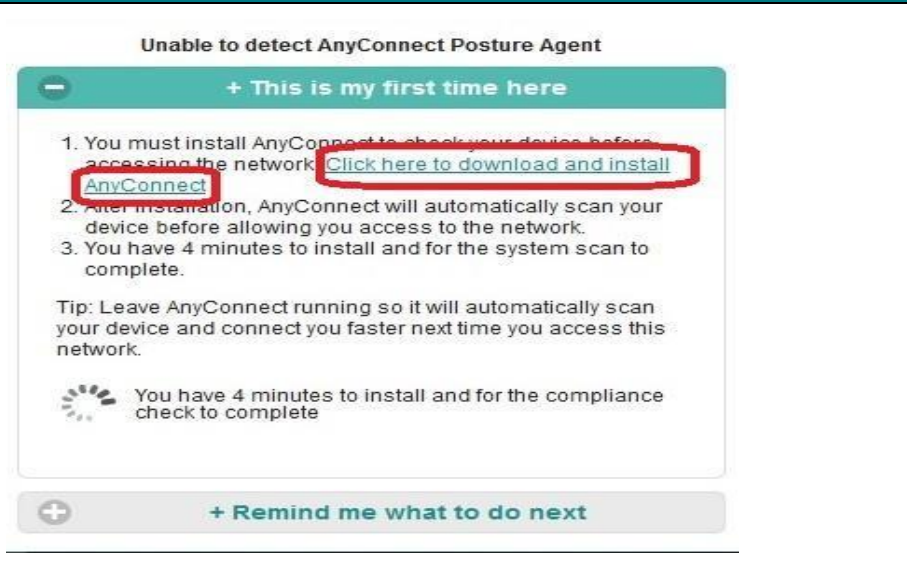

Click on “**Start**” so that the progress of scanning your device begins

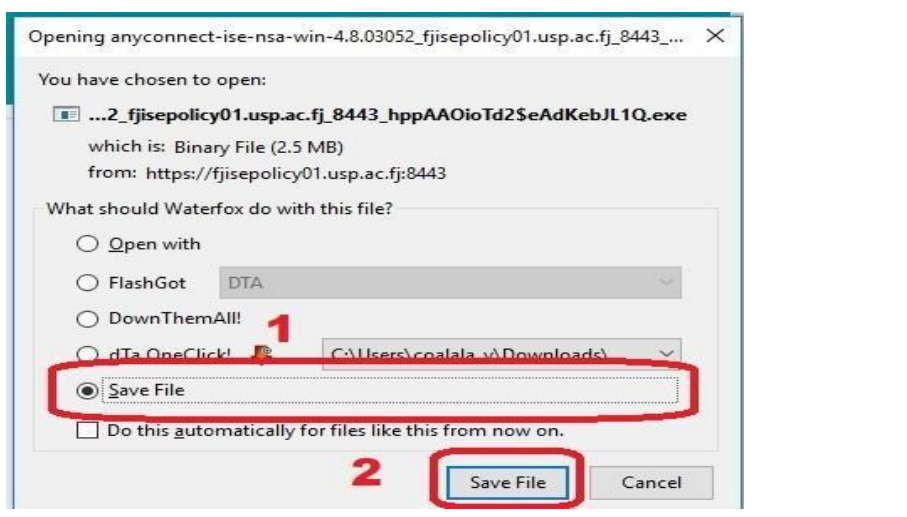

Click on the Option:  
“*This is my first time here*”  
This will start the download of an agent to scan your device for compliance

Clicking on the hyperlink;  
**“Click here to download and install AnyConnect”**

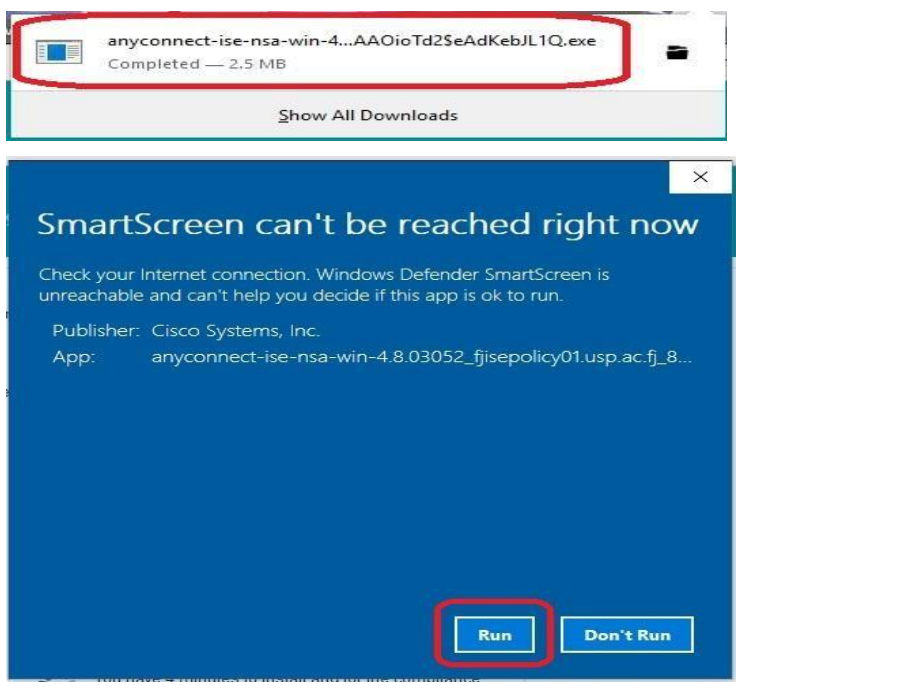

Accept the download by clicking on **“Save File”**

Double click on the downloaded file to open.

Click on **“Run”** to install application

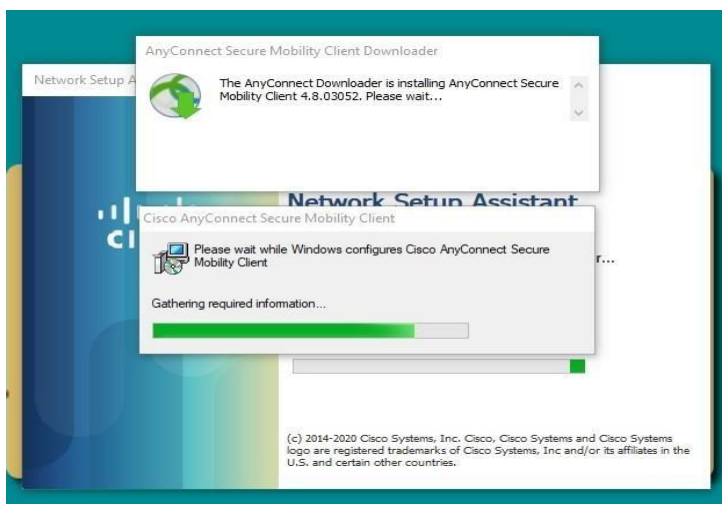

Once installed, application will run automatically.

Click on “**Connect**” when prompted too

The application will start installing.

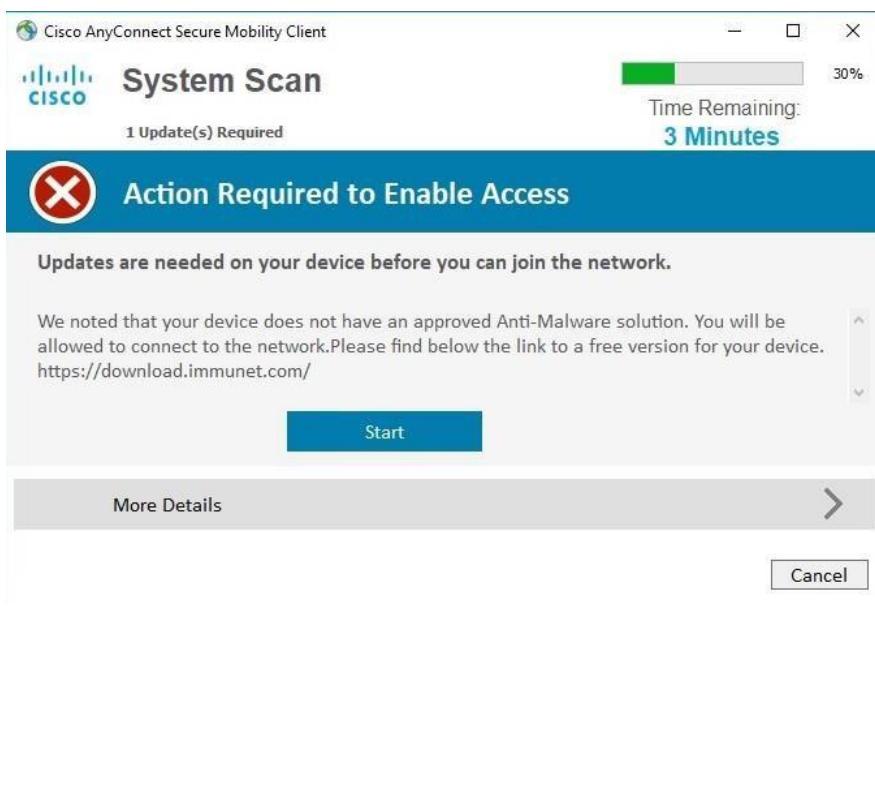

Please wait till the end of installation to continue to the next step.

The “**AnyConnect**” app will start scanning your device immediately after installation. The scan will approximately take 5mins.

**Non-Compliant** devices will receive a similar notification like the one on the right

If scan indicates that your device is **Not Compliant**, please visit your nearest IT Helpdesk.

- Once scan is completed and your device is compliant, you will get this message

\*\*Please ignore VPN option

Webpage will change to “Success”

Your device has now completed and passed the compliance check. You should be able to connect to USP WiFi services.
