

# LMMA Network

---

## Fund

US\$600,000

## Donors

John D. and Catherine T. MacArthur Foundation

## Leading Organisation

The Locally Managed Marine Area (LMMA) Network

## Partners

Institute of Applied Sciences and SeaWeb International

## Project Overview

The grant is to support "LMMA Network – From Local to Global: Upscaling local management success to improve Global Coastal Fisheries and Marine Management".

The grant started on 1st October 2013 and ends on 30th September 2015. IAS/USP has been the fiscal host for the funds since 2000.

The LMMA Network promotes community based adaptive management (CBAM), which is integration of design, management and monitoring in order to learn and improve management responses undertaken primarily by local stakeholders but also with appropriate involvement of government institutions and private interests.

## Project Objectives

- Generate Robust and Relevant Lessons Learned for Users and Decision Makers by end of 2015
- LMMA '5000 Outreach: Informing good practice in local marine and coastal management globally, supporting uptake in at least one new major region by 2015
- Scaling up LMMAs in at least 2 LMMA countries by 2015
- Improve LMMA Network Regional Coordination and Sustainability by 2015

## Project Outputs

- LMMA state of the art knowledge compiled, made accessible, and disseminated
- Increased global understanding and capacity for LMMA approaches in at least one new major region
- Up-scaling of LMMA approaches in at least 2 or more countries in the Indo-Pacific region
- LMMA Network coordination and regional implementation improved and increased capacity in place in region for sustainable future
